

LEAD GENERATION CASE STUDY

Permanent Make Up Studio with High End Services 10x ROAS

RESULTS

Spent \$1488 over a month-long period which resulted in 31 qualified bookings (\$48/each), resulting in a 10X return-on-ad-spend for a local permanent makeup studio.

This client has gone on to repeat the same results month after month and is still currently running ads.

SUMMARY

Our team created ads campaigns that generated a total of 31 call bookings over a 30 day period for our new client in the permanent makeup industry in Las Vegas. We have since duplicated the process in another location: California. Client saw a 10X return on her ad spend and continues to experience success month after month.

GOAL

To successfully establish a reliable and consistent ads strategy that would generate quality call bookings for people interested in permanent makeup solutions (including brows, receding hairline, and more) for high-end permanent makeup services costing \$3000-\$5000.

CHALLENGES

We worked with this client to establish a funnel that not only booked calls, but booked quality calls with prospects who were able to invest. With our proprietary onboarding and audit process, we identified where we needed stronger screening forms and making this change provided more quality leads, plus focusing on the right ads messaging to attract the right kind of leads.
